

Siare

Siare Engineering International Group s.r.l. has worked professionally and competently for over 45 years in the design and production of electromedical equipment, exporting its products all over the world.

Siare Engineering International Group s.r.l. was founded in 1974 by **Mr Giuseppe Preziosa**, a top expert in the segments of anaesthesia and Intensive Care. The headquarter is based in the industrial area of Crespellano-Valsamoggia, near Bologna, which strategically lays in the heart of the Emilia Romagna region, the cradle of the most world-known brands in the field of automotive and packaging.

Research and Development Department

Our team of Engineers is committed to find and to design the best solutions aimed at improving the level and the quality of assistance medical staff can offer to their patients, implementing the latest technologies in the medical field.

QA Department

Our Quality Assurance Department plays a crucial role in carrying out all the necessary tests and in maintaining and introducing the most correct procedures in every phase of the Product's life.

Production Lines

Our Production area covers more than 5000 sqm where our devices are manufactured and assembled in compliance with the highest and safest standards. Each range of product has a dedicated area:

- Anaesthesia machines;
- Intensive Care Ventilators;
- Portable emergency ventilators;
- Home Care ventilators.

Sales Department

Our Sales Department has two highly qualified teams who take care of Italian and International markets with passion and dedication, which enable us to satisfy every Customer's needs in every Country and to increase our market share in different areas, thus establishing SIARE as one of the strongest brand in the Medical field.

Accounting and Finance Department

This is the core of our accounting and financial management, enabling the company to allocate the best resources for long term projects and to deal with administrative issues on a daily basis.

Meeting Room

In this dedicated space we organize meetings, conference calls, technical and commercial trainings with our Customers and Distributors in order to share the latest news and to have up-to-date feedbacks from the market.

Show Room

We created a special area featuring the various settings where our devices find a natural location:

- Operating rooms;
- Intensive care units;
- Neonatal Intensive care unit.

MISSION

All our work is based on scientific research and on the development of the next-generation medical technologies to ensure the highest quality of our life-saving products. By continuously improving our products we give our practical contribution to the improvement patients' health and life.

VISION

We bring the philosophy of "Made in Italy" in the world, always developing innovative products of the highest quality, thanks to the implementation of dedicated design, continuous research and cutting-edge technologies.

Hybrid anaesthesia ventilator: the ground-braking technology.

MORPHEUS ND
HYBRID

MORPHEUS M

**SIARETRON 4000 15"
HFOV**

In the field of respiratory assistance, we offer high standards technology products that significantly improve the patient's life.

Siare

CRITICAL CARE/INTENSIVE CARE

SIARETRON 4000 15"

ARIA 150

FALCO 202 EVO

ARIA 150 C

We covers different situations, from intensive to critical care transport.

ARIA 104

FALCO 202 EVO
TRANSPORT

FALCO 202

We give a particular attention to the Home Care sector and offer a wide range of products.

CAP 700

FALCO 101

Our portable emergency ventilators of small dimensions and light weight are suitable for the respiratory treatment of adults, children and new born for both invasive and non-invasive ventilation.

SIRIO S2T
with Spirometry

SIRIO BABY 200

SIRIO S2T

MORPHEUS LT MRI

Our ventilators and anaesthesia machine are compatible for Magnetic Resonance rooms from 1,5 to 3 Tesla.

SIRIO S2T MRI

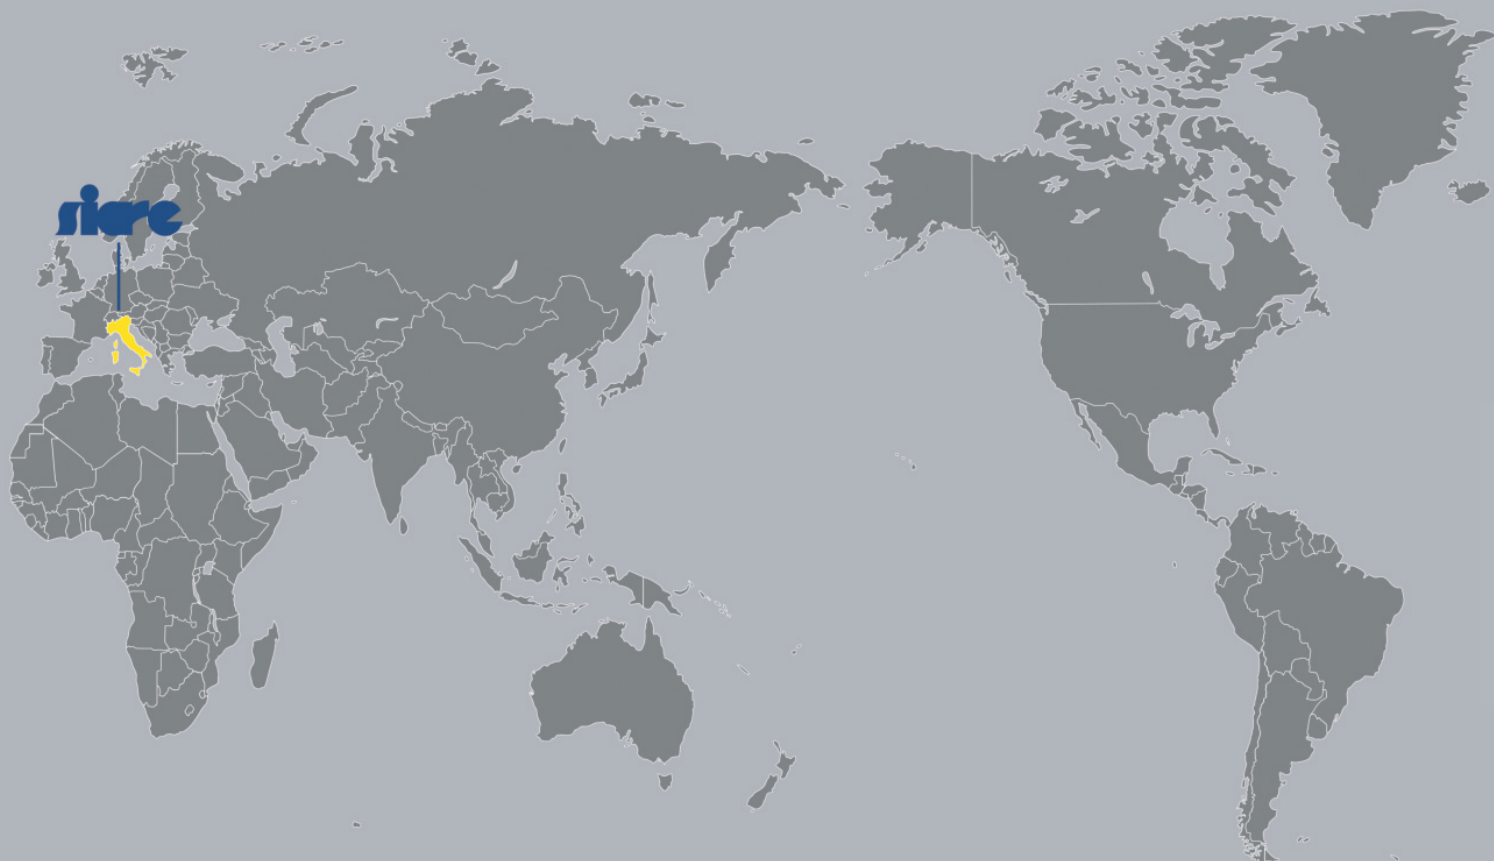

SIRIO BABY 200 MRI

SIARETRON 1000 IPER

We have more than 30 years of proven experience in the respiratory treatment of patients in hyperbaric chamber up to 60 meters depth.
